May 21, 2022

CONTENTS:

1	Feature Overview	3
1.1	Getting Started	3

Zest Script is an all-in-one configuration manager for IT companies and MSP's that enable them to on-board client's computers quickly and easily using a configurable file. It stores the configuration for a company or computer in a single .XML file that can later be read by the application and then modified for the specific computer that is being on-boarded.

FEATURE OVERVIEW

- Customize the computer name, domain, time-zone, and NTP server.
- Create user accounts.
- Create pre-configured Wi-Fi and VPN profiles.
- Add a list of applications to install.
- Create network drive mappings.
- Create printer mappings.
- Import/Export configuration file for later use.
- View a configuration file without messing up the current configuration.

1.1 Getting Started
